

Bonus 2

Deadline: Check Piazza

Here are your learning goals: More shellshock, less guidance.

You've got this covered.

Your Task

Find **priv_shell** installed under `/usr/local/bin/`. It gives you a privileged shell, but only if you're worthy.

You know the drill.

Prove your worth, get **prog9** privileges, execute `/usr/local/bin/win`, collect your token.

That's all Folks!

Tips and Hints

- Yeah...no.

Submission

1. Create the challenge directory tree `~/submissions/bonus2/`
2. Create `submission.txt` in the challenge directory. Copy your token in there.
3. Run `submit bonus2`

Wait a few moments, and check the results. By the time you get this right, we'll all have learned an important lesson. Don't forget to check out the Hall of Fame:

<https://www.khoury.northeastern.edu/home/kaan/rankings.html>

Good luck, and happy exploitation!
