

# Bonus 1

## Deadline: Check Piazza

Here are your learning goals: ???

## Your Task

We have a new server running on 192.168.1.77, now on port **4001**.

Do **Challenge 1** all over again with this new server!

Waaaait... something's not quite right...

*That's all Folks!*

## Tips and Hints

- Obviously the server doesn't lie to you, it cooperates to the best of its ability. Otherwise you couldn't solve the challenge. Blame it on the low connection quality.

## Submission

1. Create the challenge directory tree `~/submissions/bonus1/`
2. Create `submission.txt` in the challenge directory. Copy the solution **base64(hash(token))** into this file on a single line. It should look something like this:  
**oUaMyAJYgoocyvr5dfrOoN/XS95ZGtqCKT32L4+IQhE=**
3. I want to know how you approached and solved this challenge. Create a file named `explanation.txt` in the challenge directory. Write **a few sentences** to explain what you did. **DON'T WRITE AN ESSAY**, just a brief summary of the main points.
4. Run `submit bonus1`

Wait a few moments, and check the results. If you got it right, consider yourself a pro, you've earned it. Don't forget to check out the Hall of Fame:

<https://www.khoury.northeastern.edu/home/kaan/rankings.html>

Good luck, and happy ?!
